"CONCRETE & CONSTRUCTIONAL ENGINEERING"

VOL. L *FIFTIETH YEAR OF PUBLICATION* 1955

CONCRETE PUBLICATIONS, LTD., 14 DARTMOUTH STREET, LONDON, S.W.1

INDEX

PAGE

Abbreviations, The use of 335, 413
Aggregates, Cooling 197
Air-conditioned building 363
Air-entrained concrete, Resistance to frost of .. 77

AUTHORS:

Abeles, P. W., on Design assumptions and the behaviour of prestressed concrete, 317; on Design of statically-determinate beams and slabs in prestressed concrete based on ultimate load .. 201
Allan, D. W., on Design of corner columns .. 418
Armstrong, W. E. I., on Renovation of a deteriorated structure 65
Bartlett, R. J., on Bending and axial forces, 31; Bending and axial stresses in circular columns .. 293
Chronowicz, A., on Determination of constants for non-prismatic beams by the moment-distribution method 381
Cohen, Jacques S., on Design of helical staircases .. 181
Creswell, D. A., on Design of tee-beams and hollow-tile floors 167
Dennington, D., on The effect of the wind on open frames 217
Gallia, A., on Prestressed concrete slab bridges with stiffened edges 117
Ketchum, Milo S., on "Folded-plate" roofs in the U.S.A. 3
Lee, Donovan, on Prestressed concrete bridges .. 155
Morgan, V. A., on Analysis of single-bay gable frames 249
Muller, L. S., on Bending-moment factors based on the theory of plastic hinges 149
Pearson, D., on Reconstruction of Parkeston quay, Harwich 173
Rygol, J., on The analysis of frames by the nomographic method, 351, 394; on Closed annular sections subjected to bending and direct compression 79, 135
Sezginer, T., on Design of Tee-beams by a semi-graphic method 427
Smolira, M., on Analysis of statically-indeterminate structures by the deformation method 95
Vaswani, H. P., on Design of non-prismatic members 283
Wefring, P., on Design of singly-reinforced beams .. 415
Axial forces, Bending and, by R. J. Bartlett .. 31
,, stresses in circular columns, Bending and, by R. J. Bartlett 293

Beams and hollow-tile floors, Design of tee-, by D. A. Creswell 167
,, Design of singly-reinforced, by P. Wefring .. 415
,, by a semi graphical method, Design of Tee, by T. Sezginer 427
,, by the moment-distribution method, Determination of constants for non-prismatic, by A. Chronowicz 381
Bending and axial forces, by R. J. Bartlett 31
,, and axial stresses in circular columns, by R. J. Bartlett 293
,, and direct compression, Closed annular sections subjected to, by J. Rygol 79, 135
Bins, The flow of materials from 271

BOOK REVIEWS:

An Electric Model of Beams and Plates, by E. T. Rudso 404
Analysis of Statically Indeterminate Structures, by J. I. Parcel and R. B. B. Moorman 362
Analysis of Symmetrical Cylindrical Shells, by J. McNamee 432
Architects' Detail Sheets 238
As Linhas de Influência nos Pórticos Continuous Planos e do Espaço Tridimensional, by Samuel Chamecki 260
Baumaschinen-Wartung, by H. Ilsemann 238
Beton-Kalender, 1955 260
Building Materials: Their Elasticity and Inelasticity 260

BOOK REVIEWS (*contd.*):

PAGE

Building Technicians' Diary 1955 194
Civil Engineering Design Notes and Sketches, by T. W. Barber 362
Concrete Structures in India 328
Constructional Steelwork, by Oscar Faber 362
Das Knicken gerader Stäbe mit linear veränderlicher Langskraft im elastischen und unelastischen Bereich, by F. Reinitzhaber 432
Data Book for Civil Engineers. Vol. 3, Field Practice 288
Der Dammbau: Grundlagen und Geotechnik der Stau-und Verkehrsdämme, by Karl Keil .. 404
Design of Concrete Structures, by L. C. Urquhart, C. E. O'Rourke, and G. Winter 7
Design of Cylindrical Shell Roofs, by J. E. Gibson and D. W. Cooper 134
Elementary Plane Surveying, by R. E. Davis .. 328
First Congress of the Fédération Internationale de la Précontrainte 404
Forty Designs for Low-cost Houses 404
Foundation Engineering, by R. Hammond .. 362
Il Cemento Armato Precompresso, by Giuseppe Rinaldi 404
Kempe's Engineers' Year-Book 238
Laxton's Builders' Price Book 328
Les Poutres en Béton Armé soumises à la Flexion Composée, by G. Colorio 328
Mix Design and Quality Control of Concrete .. 238
Practical Concreting, by A. E. Peatfield 328
Precast Concrete, by K. Billig 432
Proceedings of a Symposium on Concrete Shell Roof Construction 194
Reinforced Concrete Arch Design, by G. P. Manning 194
Rohrhydraulik: Ein Handbuch zur praktischen Stromungsberechnung, by H. Richter 404
Solution of Problems in Surveying and Field Astronomy, by H. W. Stephenson 288
Steel Designers' Manual, by C. S. Gray, L. E. Kent, W. A. Mitchell, and G. B. Godfrey 260
Testing Concrete by an Ultrasonic Pulse Technique, by R. Jones and E. N. Gatfield 328
Theory of Structures, by H. W. Coultas 194
The Value of Good Design 238

Bridge at Nottingham, New 146
,, cast vertically, Arches for a 367
,, designed for mining subsidence 40
Bridges, Recent reinforced concrete 223

Cement as insulation, Foamed 198
,, Expanding 62
,, in hot humid atmospheres, Strength of high-alumina 366
,, New refractory 407
Centering and reinforcement, Combined 446
Church in Morocco 228
Clydebank, Retaining wall at 241
Columns, Bending and axial stresses in circular, by R. J. Bartlett 293
,, Design of corner, by D. W. Allan 418
,, Design of lighting 70
,, Eccentrically-loaded 303
,, without capitals, Flat slabs supported by 141
Compression, Closed annular sections subjected to bending and direct, by J. Rygol 79, 135
"Concrete and Constructional Engineering" prize design 154
Consolidating granular soil 312
Curing of concrete, Electrical 211
,, on the site, Steam 232

Dams, Design of gravity and arch 375
,, Precast facing blocks for 68
Deformation method, Analysis of statically-indeterminate structures by the, by M. Smolira .. 95
Design assumptions and the behaviour of prestressed concrete 369
,, decoration, and utility 1

Earthquakes, A building to resist 346
Education in a technical age, Liberal 281

PAGE

Electrical curing of concrete 211
Elevator, Collapse of a grain 345

Firth of Forth, Proposed subway under the 128
Flats and schools, Paddington, London, Residential .. 53
,, Construction of multi-story 233
,, Putney, London, Residential 49
,, Wandsworth, London, Residential 44
,, Westminster, Residential 36
Floor construction, "Lift-up" 292
Flooring, New system of precast 448
Floors, Design of tee-beams and hollow-tile, by D. A. Creswell 167
,, Heating coils in concrete 278, 308
"Folded-plate" roofs in the U.S.A., by Milo S. Ketchum 3
Foundation designed for subsidence due to mining .. 17
Frame construction, New system of precast 239
Frames, Analysis of single-bay gable, by V. A. Morgan 249
,, by the nomographic method, The analysis of, by J. Rygol 351, 394
,, spanning 85 ft., Precast 275

Gantries at a gasworks 91
Garage in London, A bus 21
Garages, Multiple-story 336, 423
Gasworks, Structure at a 60
Germany, Concrete roads in 59
,, Permissible stresses in steel in 227
Grain elevator, Collapse of a 345

High-alumina cement in hot humid atmospheres 366
Holland, Canal lock in 265

Improvers for concrete 247
Information, The duplication of 147
Insulation, Foamed cement as 198

Joints, Expansion 344

Lighthouse, Repairing a 373
Lighting columns, Design of 70
Lock in Holland, Canal 265

Magnel, The late Professor Gustave 287, 333
Market in Italy, A covered 326
Mixing plant, An automatic proportioning and .. 332
Moment-distribution method, Determination of constants for non-prismatic beams by the, by A. Chronowicz 381
Morocco, Church in 228

Nationalising construction, A proposal for 179
Nervi, Professor Pier Luigi, on Concrete and structural form 387
Nomographic method, The analysis of frames by the, by J. Rygol 351, 394
Non-prismatic members, Design of 374
,, members, Design of, by H. P. Vaswani 283
Nottingham, New bridge at 146
Nuclear radiation, Concrete as a protection against .. 349

Parkeston quay, Harwich, Reconstruction of, by D. Pearson 173

PATENTS:
Design for moving loads 411
Joints in roads 144
Prestressed concrete 347
Protecting reinforcement 411
Roofs for circular buildings 145
Shutters for curved surfaces 178
,, for floors and walls 144

PAGE

PATENTS (*contd.*):
Shutters for junctions of columns and beams .. 145
,, for tunnels 411
Tensioning wires, Device for 302
Test for consistency 347
Piles formed in paper tubes 88
,, Heavy loads on 291
Placing, and finishing concrete, Developments in proportioning 71
Plastic hinges, Bending-moment factors based on the theory of, by L. S. Müller 140
Precast arch roof, New type of 329
,, building in Riga, Multiple-story 195
,, concrete in an office building 405
,, construction, New method of 130
,, frame construction, New system of 239
,, frames spanning 85 ft. 275
Prismatic roofs, by Milo S. Ketchum 3
Proportioning and mixing plant, Automatic 332
,, concrete mixtures .. 215, 221, 431
,, placing, and finishing concrete, Developments in 71

Quay, Harwich, Reconstruction of Parkeston, by D. Pearson 173

Radiation, Concrete as a protection against nuclear .. 349
Reinforcement and centering, Combined 446
Renovation of a deteriorated concrete structure, by W. E. I. Armstrong 65
Road-making machines, German concrete 339
Roads, A programme for 115
,, Concrete 208, 379
,, in Germany 59
,, Longitudinal reinforcement in 240
,, Research on 274
Roof in Stockholm, Cantilevered 264
,, New type of precast arch 329
Roofs, in the U.S.A., "Folded-plate", by Milo S. Ketchum 3
,, Precast "shell" 408

Sea defence, Revetments for 338
,, defences on the Norfolk coast 28
Shell roofs built with travelling centres 9
,, roofs, Precast 408
Shorthand for engineers 315, 413
Silos, Design of 170
Slab, Strengthening a 433
Slabs supported by columns without capitals, Flat .. 141
Soil by vibration, Compacting 291
,, Consolidating granular 312
Staircase, An unusual 410
Staircases, Design of helical, by Jacques S. Cohen .. 181
Standardisation of structural members 27
Steel in Germany, Permissible stresses in 227
Stockholm, Cantilevered roof in 264
Subsidence, Bridge designed for mining 40
,, due to mining, Foundation designed for 17
Subway under the Firth of Forth, Proposed 128

Tampa Bay bridge, U.S.A. 12
Tunnel in Scotland 313

Vibration, Compacting soil by 291

Wall at Clydebank, Retaining 241
Water tower, Rapid construction of a 47
Welding large bars, Unusual method of 140
Wind on open frames, The effect of, by D. Dennington 217

PRESTRESSED CONCRETE

PAGE

Aqueduct, A prestressed precast 222
Beams and slabs in prestressed concrete based on ultimate load, Design of statically-determinate, by P. W. Abeles 201
,, Strength of 277
,, Tests on lightweight 301
Bridge in Amsterdam 133
,, in Ireland 39
,, in the U.S.A. 298
,, in Venezuela, Arch 107
,, Pipe 229
,, Railway 42
Bridges in Belgium 261
,, Prestressed concrete, by Donovan Lee .. 155
,, Prestressed slabs for railway 69
,, with stiffened edges, Prestressed concrete slab, by A. Gallia 117
Composite reinforced and prestressed construction .. 363
Congress on prestressed concrete 372
Deformed bars 143

PAGE

Design assumptions and the behaviour of prestressed concrete, by P. W. Abeles 317
Equipment, Lightweight 374
Floor construction, New system 309
Footbridge, Precast 13
Loss of prestress with time 280
Office building in the U.S.A. 420
Pile 192 ft. long, Prestressed 297
Pre-tensioned wires, Prestressed concrete with : an American specification 75
Reservoirs, New method of prestressing circular .. 289
Road in France, Experimental prestressed 199
Rome, Large prestressed roof in 73
Roof beams of 123 ft. span 370, 393
,, in Rome, A large 73
,, in the U.S.A. 444
Tank, Broken wires in a 259
Tests on beams with pre-tensioned wire 209
Water tower 48
